

PATNANA ANIL KUMAR

AWS DevOps Engineer | Docker | Kubernetes | Terraform
+918919068327 | anilkumarpatnana555@gmail.com | Hyderabad 500032

Professional Summary:

DevOps Engineer with 4+ years of experience in cloud infrastructure, CI/CD, automation, Docker, Kubernetes, and Linux. Skilled in deployment, monitoring, troubleshooting, and improving application reliability and performance.

Technical Skills:

- **Operating Systems:** Linux
- **Cloud Platform:** AWS (EC2, S3, EBS, EFS, IAM, VPC, Elastic Load Balancer, CloudWatch, SNS, ECR, ECS, EKS, Route 53)
- **Infrastructure as Code:** Terraform
- **Containers & Orchestration:** Docker, Kubernetes
- **Version Control:** Git, GitHub
- **CI/CD:** Jenkins
- **Monitoring & Logging:** Grafana, Dynatrace, CloudWatch

EXPERIENCE:

Tata Consultancy Services (TCS)

Senior Systems Engineer | March 2022 - Current

DevOps Engineer | June 2023 – Current

Key Responsibilities & Activities:

- Developed and maintained CI/CD pipelines using Jenkins for automated application build and deployment processes.
- Managed Kubernetes-based application deployments across development, staging, and production environments.
- Developed and maintained reusable Terraform modules for standardized infrastructure provisioning across environments.
- Managed AWS services including EC2, IAM, RDS, VPC, S3, ECR, and EKS.
- Supported production deployments, troubleshooting, incident resolution, and rollback activities.
- Prepared and maintained RCA documents for production incidents and deployment failures, including root cause, resolution, and preventive actions.
- Collaborated with development and QA teams during release cycles and deployment activities.
- Implemented and supported GitOps-based deployment workflows using Kubernetes and Argo CD.
- Configured monitoring and alerting solutions using Prometheus and Grafana.
- Supported AWS optimization initiatives by identifying underutilized resources and improving cloud resource utilization.

OBSERVABILITY ENGINEER | March 2022 - May2023

Key Responsibilities & Activities:

- Monitored infrastructure and applications across Windows, Linux, middleware, and database servers.
- Monitored key infrastructure metrics including CPU, memory, disk utilization, and server availability.
- Monitored application health and availability across microservices-based applications.
- Monitored pods and workloads using Red Hat OpenShift Console and identified pod failures, restarts, and availability issues.
- Investigated alerts and failures across infrastructure and application environments and coordinated with respective support teams for resolution.
- Communicated application and microservice issues to relevant teams through incident notifications and email.
- Initiated and coordinated bridge calls for critical microservice and production issues with relevant stakeholders until resolution.
- Followed up with application, middleware, database, and infrastructure teams during major incidents.
- Maintained incident details and prepared RCA documents covering root cause, resolution, and preventive actions.
- Monitored production environments continuously and escalated critical alerts according to defined severity and escalation procedures.
- Provided regular incident updates to stakeholders during critical production issues.

Education:

- **B. Tech – Mechanical Engineering**
Miracle Eng college – JNTU Kakinada | 2017 – 2021 | GPA: 7.30
- **INTERMEDIATE – M.P.C**
Sri Vidya Vahini junior college - Palasa, Andhra Pradesh | 2015 - 2017 | 75.2%
- **10th Standard**
Sri Gurukula Vidyalayam – Palasa, Andhra Pradesh | 2015 | GPA: 8.0

Certifications:

- AWS Certified Cloud Practitioner
